Erfan Azimi

junior Front-end Developer
Malard, Tehran Province, Iran

Summary

From the age of 18, I worked at a photography studio for 8 months, where I was involved in image editing and photography. Through self-teaching, I learned Adobe Photoshop and Adobe Illustrator software, and then started taking on small graphic design projects as a freelancer. I later collaborated with Zee Architecture and, in addition to graphic design, learned to design websites using WordPress according to their needs. Some of the actions I took for Zee Architecture included designing posters and creating an e-commerce website with a payment gateway.I decided to pursue a government job while also working remotely with Zee. In 2020, I was hired on a contractual basis by the Islamic Azad University Publishing Organization (ISBA) while being the youngest member of the organization.In 2021, I was invited to collaborate with the faculty of International Studies at the University of Tehran. I played a role in organizing and leading virtual meetings and several international conferences.

Experience

University of Tehran
Conducting virtual meetings - Faculty of World Studies (FWS)
January 2020 - December 2024 (5 years)
Tehran

ACECR-Production Technology Institute
Graphic Designer
April 2020 - April 2021 (1 year 1 month)
Tehran, Tehran Province, Iran

In this semi-governmental organization, I was responsible for the design of the publishing organization's posters, as well as the management of the virtual pages and the website of the online book store of this organization.
And in the international conferences of this organization, such as the "First International Conference on Publishing Research", I was responsible for the technical team.
